Comparable deal							
Valuation, EUR	415m	~300m		240m	550m		2,6b
Description	<i>Acquired by Quest after indicative predictive data (2023)</i>	<i>Raised 90m after NCCN guideline inclusion (2023)</i>		<i>IPO when selling approx. 15k tests (2019)</i>	<i>Acquired by Veracyte with revenue at ~37m EUR (2021)</i>		<i>Acquired by Exact Sciences when selling 140k tests (2019)</i>

# The platform has ample opportunities to grow and expand

## Standalone marker in colorectal cancer

- Prognostic, become predictive
- Into standard workflow
- Short turnaround time
- Scalable, low cost

## Combination diagnostics

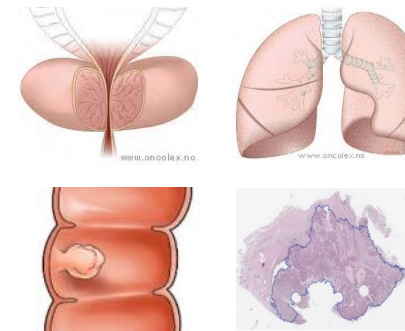

### Liquid biopsies

- Differentiation
- Short turnaround time
- Identify false negatives

### Gene profiling

- Increase precision
- Short turnaround time

## Portfolio expansion

- Prostate
- Lung
- Colorectal polyps
- Metastatic colorectal cancer

## Drug development

- Risk stratification
- Companion diagnostic
- Co-develop algorithms to predict drug response

# Do More Diagnostics provides an attractive risk-reward investment opportunity

**1** Addressing large medical need to **personalize cancer treatment**

**2** Leading the wave of AI outcome prediction with a CE-marked application

**3** Targeting an **attractive market** with current price per test at **USD 4000**

**5** De-risked case with low investments and short timelines to reach major value inflections and potential exit

**4** Significant **progress**, strong **partnerships** and **soft funding** secured

# AI and digital pathology will revolutionize precision diagnostics

Genomic profiling methods are unable to capture key features and malignancy potential of the tumor

- Genomic profile *Focus until now*

- Epigenetics *Deep tumor analysis*

- Tissue patterns

- Stroma

- Heterogeneity

- Microenvironment

- Tumor plasticity

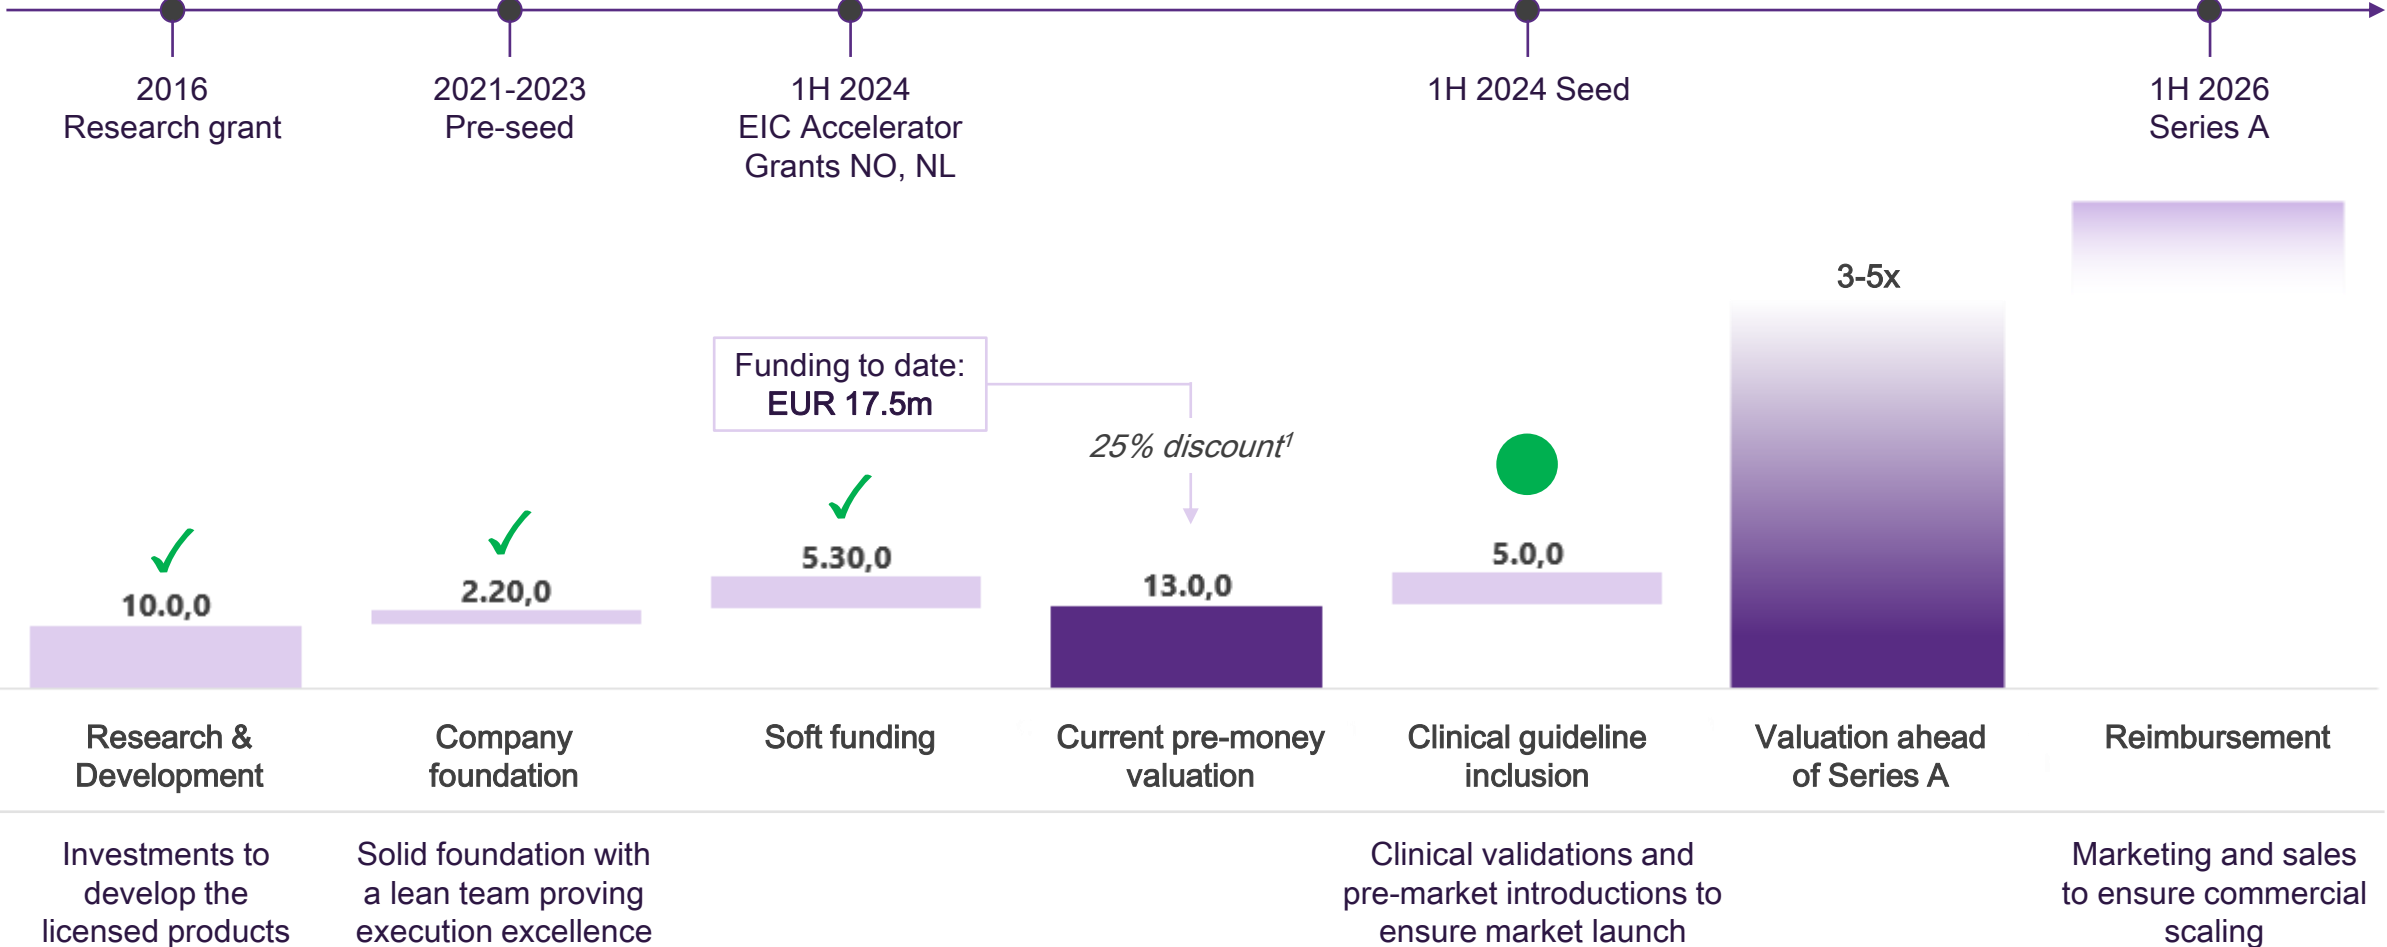

- ...and more

# De-risking with soft funding and significant upcoming value inflections

✓ Completed ● Current

EUR million

<sup>1</sup> Based on a price per share of NOK 2,5 in upcoming share issue. EUR to NOK 11,5

# Strategically positioned in the high margin segment of digital pathology

Leading outcome prediction in colorectal cancer

## Low-margin segment

## High-margin segment

### Scanners

### Image management systems

### AI diagnostic support

### AI for prognosis and prediction

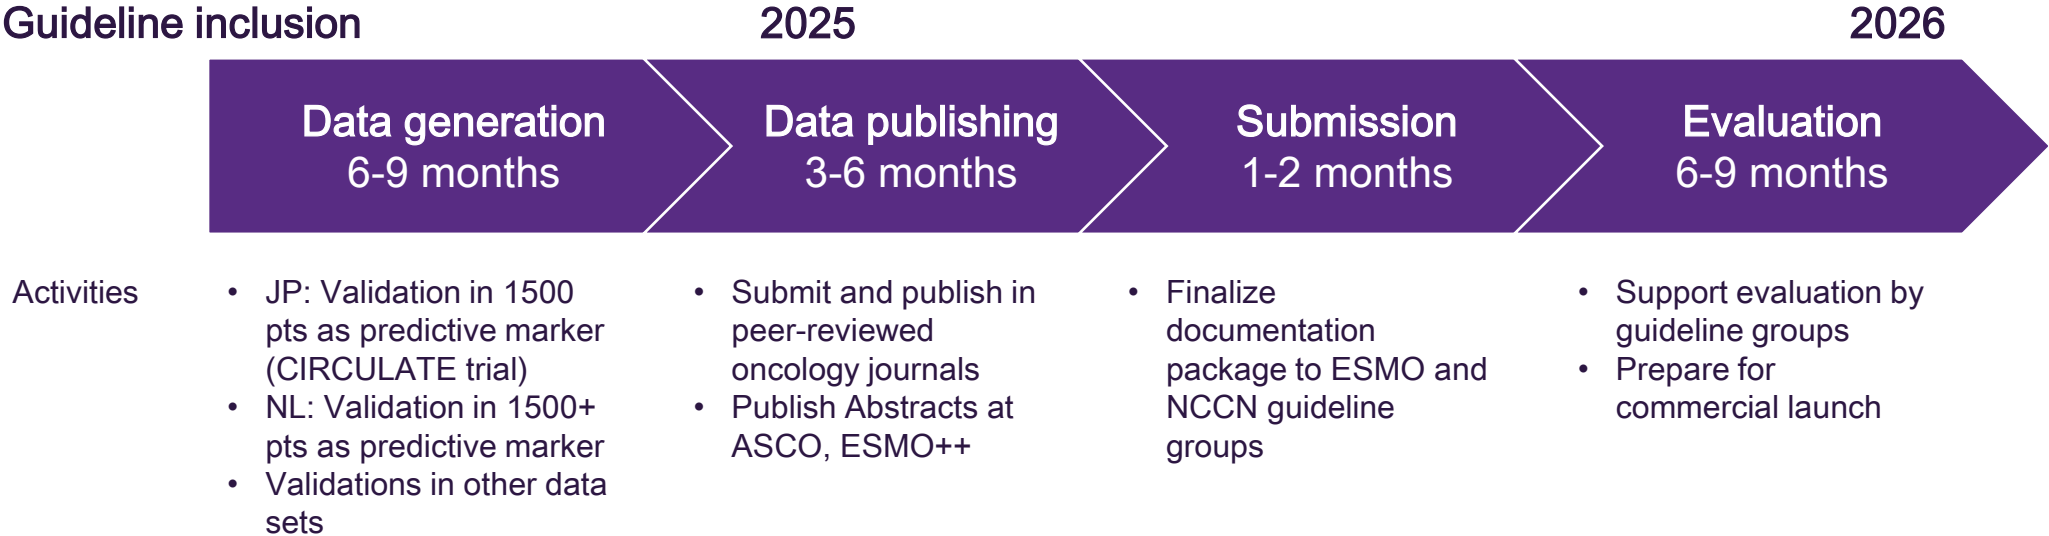

Source: Company websites; Company analysis. Non-exhaustive examples. Some companies operates in more than one segment. Artera focus on prostate. Owkin, PreciseDx and Stratipath focus on breast.

# Defined path towards guideline inclusion and reimbursement

## Commercial launch at inclusion in clinical guideline

### Guideline inclusion

### Reimbursement
